PRESS RELEASE

TMK supplies pipe to LUKOIL Uzbekistan Operating Company for its Kandym project

TMK, one of the world's leading producers of tubular products for the oil and gas industry, has supplied piping to LUKOIL Uzbekistan Operating Company, an affiliate of LUKOIL Overseas (operator of LUKOIL's international projects).

The shipment consisted of the 88.9x6.45 mm H₂S-resistant steel tubing compliant with the API 5CT standard and complete with TMK UP PF premium threaded connections. The tubes were produced at TMK's Sinarsky Pipe Plant. The manufacturing process was overseen by an independent monitor, the Swiss Engineering Group, as required by the contract.

LUKOIL Uzbekistan Operating Company will use these pipes to develop the gas condensate fields of the Kandym group located in the Bukhara-Khiva Region (southwest Uzbekistan). The Russian operator is currently developing the Kandym project based on a production sharing agreement (PSA) with the Uzbekneftegaz National Holding Company.
